

# The Necessary Nurse Concierge Services™

***We help keep moms healthy***

Our mission is to be a trusted technology and capacity provider of the global nursing care industry and corporate healthcare training on evidence-based practices.

## CORE COMPETENCIES

 At The Necessary Nurse Concierge Services (TNNCS), we are passionate about advocating for evidence-based and compassionate nursing care. Our primary training offering is in healthcare and leadership training, including corporate healthcare training, with a focus on addressing key issues such as cyber-security in healthcare, healthcare inequality, and postpartum health.

Our vision is to become the leading provider of in-home and on-demand postpartum nursing care services, leveraging the latest technologies to deliver remote care to geographically marginalized communities. To achieve our vision, we partner with public and private stakeholders to reduce health disparities in marginalized communities and improve overall health outcomes.

To realize our vision, we have a trinity of strengths: we are a technology leader and a reputable, service-oriented, and maximum-total-benefits provider of nursing care services. Through our licensed professionals in multiple states, we offer telehealth, telephonic, and in-person nursing care, mental health support, postpartum care services, lactation consulting, and quality practicum experiences for nursing students.
